

I claim:

1. A back scrubber-massager for a shower/bathtub surround having an elongated wall with a generally smooth top, an upper portion of an end of the wall being rounded for comfort and safety reasons, an edge of the top of the wall being rounded for comfort and safety reasons, a side of the wall being smoothly curved such that an angle between the side and a bottom of the wall being less than 90 degrees for easy cleaning purposes; as an option, a layer of adhesive material being attached to a bottom of the wall.
2. The back scrubber-massager for shower/bathtub surround according to Claim 1 having a texture on the top of the elongated wall.
3. The back scrubber-massager for shower/bathtub surround according to Claim 2 wherein the texture is constituted by one or more longitudinal grooves.
4. A shower/bathtub surround having a built-in back scrubber-massager; the back scrubber-massager having an elongated wall with a generally smooth top, an upper portion of an end of the wall being rounded for comfort and safety reasons, an edge of the top of the wall being rounded for comfort and safety reasons, a side of the wall being smoothly curved such that an angle between the side and an adjacent surface of the surround being greater than 90 degrees for easy cleaning purposes.

5. The built-in back scrubber-massager of a shower/bathtub surround according to Claim 4 having a texture on the top of the elongated wall.
6. The built-in back scrubber-massager of a shower/bathtub surround according to Claim 5 wherein the texture is constituted by one or more longitudinal grooves.
7. A back scrubber-massager for shower/bathtub surround having two parallel, elongated walls each with a generally smooth top; an upper portion of an end of the wall being rounded for comfort and safety reasons, an edge of the top of each of the two walls being rounded for comfort and safety reasons, an outer side of the walls being smoothly curved such that an angle between the side and a surface of a bottom of the walls being less than 90 degrees for easy cleaning purpose, a lower inner side and a bottom between the walls being smoothly curved for easy cleaning purpose; as an option, a layer of adhesive material being attached to a bottom of the walls; as another option, a protrusion being on an inner side of each of the two walls.
8. A back scrubber-massager for shower/bathtub surround according to Claim 7 wherein the top of each of the two walls has a texture on it.
9. A back scrubber-massager for shower/bathtub surround according to Claim 8 wherein the texture is constituted by one or more longitudinal grooves.

10. A shower/bathtub surround having a built-in back scrubber-massager; the back scrubber-massager having two parallel, elongated walls each with a generally smooth top, an upper portion of an end of each of the walls being rounded for comfort and safety reasons, an edge of the top of each of the two walls being rounded for comfort and safety reasons, an outer side of the walls being smoothly curved such that an angle between the side and an adjacent surface of the surround being greater than 90 degrees for easy cleaning purpose, an inner side and a bottom between the walls being smoothly curved for easy cleaning purpose, as an option, a protrusion being on an inner side of each of the two walls.
11. The built-in back scrubber-massager of the shower/bathtub surround according to Claim 10 wherein the top of each of the two walls has a texture on it.
12. The built-in back scrubber-massager of the shower/bathtub surround according to Claim 11 wherein the texture is constituted by one or more longitudinal grooves.
